## PROFESSIONAL SUMMARY

Software Engineer and BCA student with hands-on experience building full-stack applications, AI-powered systems, multi-agent solutions, and cybersecurity-focused projects. Skilled in Python, Java, JavaScript, React, Node.js, FastAPI, Spring Boot, SQL, modern databases, cloud platforms, and AI technologies. Interested in building intelligent, scalable, and secure software systems.

## TECHNICAL SKILLS

|                     |                                        |                       |                                                                  |
|---------------------|----------------------------------------|-----------------------|------------------------------------------------------------------|
| <b>PROGRAMMING:</b> | Python, Java, JavaScript, SQL          | <b>CYBERSECURITY:</b> | Ethical Hacking, Kali Linux, Network Security, Threat Detection, |
| <b>FRONTEND:</b>    | React, HTML, CSS, Tailwind CSS         | <b>SYSTEMS:</b>       | Linux Administration, Windows Setup, Hardware Diagnostics, T     |
| <b>BACKEND:</b>     | Node.js, FastAPI, Spring Boot          | <b>DATABASES:</b>     | MySQL, MongoDB, PostgreSQL, Firebase, Supabase                   |
| <b>AI / ML:</b>     | Machine Learning, LLMs, RAG, AI Agents | <b>TOOLS / CLOUD:</b> | Git, GitHub, Docker, AWS, Vercel, Render                         |

## SOFTWARE ENGINEERING PROJECTS

|                                                                                                                                                                                                                                                                                                                                                                                                                                                   |                        |
|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------|
| <b>SENTRA — Passive Unidirectional Cyber Threat Detection SOC</b><br><i>FastAPI • Scapy • PostgreSQL • React • TypeScript   SIH 2026 Problem ID: 26145</i> <ul style="list-style-type: none"><li>Engineered a passive network monitoring SOC platform for unidirectional IP data diodes with zero return path.</li><li>Streamed PCAP/PCAPNG packet captures using Scapy and extracted 5-tuple directional flow metrics into PostgreSQL.</li></ul> | <a href="#">GitHub</a> |
| <b>AI Multi-Agent Task &amp; Schedule Manager</b><br><i>Python • FastAPI • SQLite • Pydantic • JavaScript</i> <ul style="list-style-type: none"><li>Built a multi-agent AI system with a central Primary Agent router dispatching tasks to Task, Calendar, and Notes agents.</li><li>Implemented decoupled tool layers with Pydantic schema validation and transactional SQLite storage.</li></ul>                                                | <a href="#">GitHub</a> |
| <b>5minhelp — Local Service Marketplace</b><br><i>React • Node.js • Express • MySQL • Socket.io • JWT</i> <ul style="list-style-type: none"><li>Developed a full-stack marketplace connecting local customers with verified service providers in real time.</li><li>Implemented WebSocket event dispatch using Socket.io and multi-role RBAC for Customers, Workers, and Admins.</li></ul>                                                        | <a href="#">GitHub</a> |
| <b>Campus Care — Real-Time Campus Safety Platform</b><br><i>React • TypeScript • Vite • Tailwind CSS • Geolocation API</i> <ul style="list-style-type: none"><li>Engineered 1-tap SOS emergency dispatch with non-blocking GPS capture and anti-spam safeguards.</li><li>Implemented 4-tier clinical triage assessment and 7-role access control consoles for campus safety.</li></ul>                                                            | <a href="#">GitHub</a> |
| <b>UniBox League — Box Cricket Tournament Platform</b><br><i>JavaScript • Supabase PostgreSQL • Web Crypto API • Tailwind CSS</i> <ul style="list-style-type: none"><li>Implemented athlete registration with client-side SHA-256 salted password hashing using the native Web Crypto API.</li><li>Integrated real-time Supabase PostgreSQL for live coordinator verification and credential clearance management.</li></ul>                      | <a href="#">GitHub</a> |

## EDUCATION & RELEVANT COURSEWORK

|                                                                                                                                                                         |             |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------|
| <b>Bachelor of Computer Applications (BCA)</b> — Assam Down Town University                                                                                             | 2025 – 2028 |
| 1st Semester SGPA: 8.05   2nd Semester SGPA: 8.10   Class XII: 58%   Class X: 72%                                                                                       |             |
| Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Object-Oriented Programming, Computer Networks, Operating Systems, Software Engineering |             |

## TECHNICAL ACTIVITIES & LEADERSHIP

|                                                                                                                                                                                                                                                      |                         |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------|
| <b>Technical Content Creator — King of Kali Linux</b> <ul style="list-style-type: none"><li>Creating educational content around cybersecurity, ethical hacking, Kali Linux, Linux and emerging technologies.</li></ul>                               | <a href="#">YouTube</a> |
| <b>Organizer — Orientation &amp; Independence Day Programs   Assam Down Town University</b> <ul style="list-style-type: none"><li>Awarded Certificate of Appreciation for coordinating university Orientation and Independence Day events.</li></ul> | August 2026             |

## CERTIFICATIONS

- Introduction to Modern AI — Cisco Networking Academy (2025)
- Ethical Hacking — Pitronix Solutions, 7 March 2026 | Certificate ID: #00102970
