PROFESSIONAL SUMMARY

Software Engineer and BCA student with hands-on experience building full-stack applications, AI-powered systems, multi-agent solutions, and cybersecurity-focused projects. Skilled in Python, Java, JavaScript, React, Node.js, FastAPI, Spring Boot, SQL, modern databases, cloud platforms, and AI technologies. Interested in building intelligent, scalable, and secure software systems.

TECHNICAL SKILLS

PROGRAMMING:	Python, Java, JavaScript, SQL	**CYBERSECURITY:**	Ethical Hacking, Kali Linux, Network Security, Threat Detection,
FRONTEND:	React, HTML, CSS, Tailwind CSS	**SYSTEMS:**	Linux Administration, Windows Setup, Hardware Diagnostics, Tu
BACKEND:	Node.js, FastAPI, Spring Boot	**DATABASES:**	MySQL, MongoDB, PostgreSQL, Firebase, Supabase
AI / ML:	Machine Learning, LLMs, RAG, AI Agents	**TOOLS / CLOUD:**	Git, GitHub, Docker, AWS, Vercel, Render

SOFTWARE ENGINEERING PROJECTS

SENTRA — Passive Unidirectional Cyber Threat Detection SOC **GitHub**

FastAPI • Scapy • PostgreSQL • React • TypeScript | SIH 2026 Problem ID: 26145

- Engineered a passive network monitoring SOC platform for unidirectional IP data diodes with zero return path.
- Streamed PCAP/PCAPNG packet captures using Scapy and extracted 5-tuple directional flow metrics into PostgreSQL.

AI Multi-Agent Task & Schedule Manager **GitHub**

Python • FastAPI • SQLite • Pydantic • JavaScript

- Built a multi-agent AI system with a central Primary Agent router dispatching tasks to Task, Calendar, and Notes agents.
- Implemented decoupled tool layers with Pydantic schema validation and transactional SQLite storage.

5minhelp — Local Service Marketplace **GitHub**

React • Node.js • Express • MySQL • Socket.io • JWT

- Developed a full-stack marketplace connecting local customers with verified service providers in real time.
- Implemented WebSocket event dispatch using Socket.io and multi-role RBAC for Customers, Workers, and Admins.

Campus Care — Real-Time Campus Safety Platform **GitHub**

React • TypeScript • Vite • Tailwind CSS • Geolocation API

- Engineered 1-tap SOS emergency dispatch with non-blocking GPS capture and anti-spam safeguards.
- Implemented 4-tier clinical triage assessment and 7-role access control consoles for campus safety.

UniBox League — Box Cricket Tournament Platform **GitHub**

JavaScript • Supabase PostgreSQL • Web Crypto API • Tailwind CSS

- Implemented athlete registration with client-side SHA-256 salted password hashing using the native Web Crypto API.
- Integrated real-time Supabase PostgreSQL for live coordinator verification and credential clearance management.

EDUCATION & RELEVANT COURSEWORK

Bachelor of Computer Applications (BCA) — Assam Down Town University **2025 – 2028**

1st Semester SGPA: 8.05 | 2nd Semester SGPA: 8.10 | Class XII: 58% | Class X: 72%

Relevant Coursework: Data Structures & Algorithms, Database Management Systems, Object-Oriented Programming, Computer Networks, Operating Systems, Software Enginee

TECHNICAL ACTIVITIES & LEADERSHIP

Technical Content Creator — King of Kali Linux **YouTube**

- Creating educational content around cybersecurity, ethical hacking, Kali Linux, Linux and emerging technologies.

Organizer — Orientation & Independence Day Programs | Assam Down Town University August 2026

- Awarded Certificate of Appreciation for coordinating university Orientation and Independence Day events.

CERTIFICATIONS

- Introduction to Modern AI — Cisco Networking Academy (2025)
- Ethical Hacking — Pitronix Solutions, 7 March 2026 | Certificate ID: #00102970
